AISI RELEASES *PROFILE 2014*

Washington, D.C. – The American Iron and Steel Institute (AISI) released its *Profile 2014* today, highlighting the importance of the North American steel industry to our nation's economy, manufacturing and national security. In the 35-page booklet, AISI outlines the steel industry's economic contributions, dedication to advancing environmental stewardship, leadership in global productivity and its vital role to the automotive, construction and container markets. The *Profile 2014* includes:

- Facts about why steel is fundamental to building a sustainable future;
- The steel industry's job creation and labor performance records;
- Steel shipments by markets and statistical highlights;
- Steel's vital role to America's infrastructure and national security;
- Breakthrough technologies advancing the U.S. steelmaking process; and,
- A map of steel's presence in the U.S., and list of AISI producer members, locations and products.

Click [here](#) to view the online version of the *Profile 2014*.

AISI serves as the voice of the North American steel industry in the public policy arena and advances the case for steel in the marketplace as the preferred material of choice. AISI also plays a lead role in the development and application of new steels and steelmaking technology. AISI is comprised of 23 member companies, including integrated and electric furnace steelmakers, and approximately 125 associate and affiliate members who are suppliers to or customers of the steel industry. AISI's member companies represent over three quarters of both U.S. and North American steel capacity. For more news about steel and its applications, view AISI's Web site at www.steel.org.
